TI e Comunicação - 14 hs

# Marc Reinan Gomes

Software Engineer  
Brasil

## Resumo

# Hello!

I'm a Software Engineer specializing in the planning, development, and management of web applications and digital products.

My Areas of Expertise:

Web Backend and Frontend Development: JavaScript, HTML5, CSS3, PHP, Golang.

Frameworks and Libraries: Vue.js, Vuetify, Quasar, Nuxt 4, React.js, Next, Node.js, Adonis.js, Strapi, Express, Zend Framework, Bootstrap, Materialize, jQuery, jQueryUI.

API Design and Development: REST, GraphQL, SOAP, Webhooks, MQTT.

Web CMS: WordPress, Drupal, Moodle.

E-commerce Platforms: WooCommerce, Magento, PrestaShop, Shopify.

Mobile Development: Quasar, Cordova, React Native.

Database Modeling and Management (Relational and Non-relational): MySQL, PostgreSQL, MongoDB.

Version Control and Repository Management: GIT (GitHub, GitLab, Bitbucket).

Agile Development Methodologies: SCRUM, KANBAN, XP, LEAN.

Software Architecture Patterns: MVC, MVVM, OOP, SOA, Monolithic, Client/Server, Microservices.

UI/UX Prototyping: Wireframes, Mockups.

Requirements Engineering and System Modeling.

Responsive, Mobile-first, Cross-browser, Cross-platform Development.

Web Server Management: Linux, Apache, Nginx, Htaccess rules, XAMPP.

Cloud Server Management: GCP, Heroku, AWS, FTP, SSH.

# Want to Know More About My Soft Skills?

Initiative, self-management, transparency, proactivity, collaboration, and autonomy—I get things done!

Strong foundation in Computer Science fundamentals with a focus on Software Engineering.

Proven ability to balance leadership with individual contribution. Responsible for driving team deliveries with speed, quality, and success.

Skilled at creating simple, efficient solutions for complex and varied domains.

High resilience and adaptability to handle ambiguous or undefined challenges, even at the leadership (C-levels).

Expertise in breaking down complex domains into smaller, manageable requirements to streamline task management and team coordination.

Lifelong learner with a focus on emerging technologies.

Analytical, data-driven approach to team management and decision-making.

Holistic understanding of software architecture alongside detailed project knowledge.

...and more!

Thank you for taking the time to read this!

---

## Experiência

### ST-One

#### Senior Frontend Developer

março de 2025 - Present (1 ano 3 meses)

Curitiba, Paraná, Brasil

Software Development: Continuous work on Frontend using tools like React.js, Next, Form.io, HTML, CSS, Javascript (ES6+) and Backend with Node.js, Grafana

Collaboration: Active participation with product, design, and business teams to align goals and deliver optimal customer solutions.

Documentation: Recording technical decisions and trade-offs using tools like JSDocs, TSDocs and Click up.

Requirements Definition: Partnering with the Product Owners to ensure technical feasibility and accurate effort estimation.

Technical Support: Supporting internal teams by troubleshooting and resolving technical issues.

Consulting and Mentoring: Acting as a technical advisor through pair programming, code reviews, and mentoring, ensuring adherence to standards like Semantic Commits, Unit Tests, E2E tests and GitFlow.

Standards and Roadmaps: Defining development practices and executing roadmaps for product and microservices evolution.

## Luby

### Tech Lead

fevereiro de 2025 - abril de 2025 (3 meses)

Software Development: Continuous work on Frontend, using tools like React.js, Next, Tailwind, HTML, CSS, Javascript (ES6+); on Backend with Node.js, Nest, Adonis, Postgres; on Mobile with React Native.

Infrastructure & DevOps: manage Github CI/CD pipelines to ensure scalability, performance, and security.

Team Empowerment: Encouraging productivity, quality, and alignment through agile practices and individual support.

Workflow Management: Application of Scrum and Kanban methodologies with Jira to track metrics, identify bottlenecks, and remove blockers.

Collaboration: Active participation with product, design, and business teams to align goals and deliver optimal customer solutions.

Documentation: Recording technical decisions and trade-offs using tools like Confluence.

Requirements Definition: Partnering with the Product Owners to ensure technical feasibility and accurate effort estimation.

Technical Support: Supporting internal teams by troubleshooting and resolving technical issues.

Consulting and Mentoring: Acting as a technical advisor through pair programming, code reviews, and mentoring, ensuring adherence to standards like Semantic Commits and GitFlow.

Standards and Roadmaps: Defining development practices and executing roadmaps for product and microservices evolution.

## Pupila Brand Studio

10 meses

### Tech Lead

outubro de 2024 - fevereiro de 2025 (5 meses)

Software Development: Continuous work on Frontend, using tools like Vue.js, Nuxt 3, Nuxt-UI, Tailwind, HTML, CSS, Javascript (ES6+); on Backend with Node.js, fastAPI, Postgres and CosmosDB.

Infrastructure & DevOps: manage Bitbucket CI/CD pipelines to ensure scalability, performance, and security.

Team Leadership: Recruiting, onboarding, and mentoring developers, fostering growth and collaboration.

Team Empowerment: Encouraging productivity, quality, and alignment through agile practices and individual support.

Cloud Architecture: Implementation of scalable solutions using Azure solutions.

Workflow Management: Application of Scrum methodologies with Jira to track metrics, identify bottlenecks, and remove blockers.

Collaboration: Active participation with product, design, and business teams to align goals and deliver optimal customer solutions.

Documentation: Recording technical decisions and trade-offs using tools like Confluence.

Requirements Definition: Partnering with the Product Owner to ensure technical feasibility and accurate effort estimation.

Technical Support: Supporting internal teams by troubleshooting and resolving technical issues.

Consulting and Mentoring: Acting as a technical advisor through pair programming, code reviews, and mentoring, ensuring adherence to standards like Semantic Commits and GitFlow.

Standards and Roadmaps: Defining development practices and executing roadmaps for product and microservices evolution.

Bug Management: Handling production bugs using tools like Cypress for end-to-end testing, ensuring stability.

## Senior Frontend Developer

maio de 2024 - outubro de 2024 (6 meses)

Frontend Development: Development using Vue.js, Nuxt 3, HTML5, CSS3, JavaScript and Typescript, creating scalable and dynamic components.

API Integration: Consumption and integration of Backend APIs built with Python and fastAPI.

Client Architecture: Design and implementation of the Frontend components to Brand Zone product.

Code Reviews and Version Control: Conducting code reviews and managing repositories with Bitbucket.

Testing and Deployments: Creation of unit tests with Vitest and deployment using Azure and CI/CD pipelines with Bitbucket.

Package Management: Dependency management with npm and Vite.

Database Support: Assisting with backend database modeling for PostgreSQL and CosmosDB.

Asynchronous Processes: Support in building asynchronous workflows using Azure Functions.

Collaboration and Management:

Requirement Analysis: Analysis of business and product requirements, ideation, and prototyping.

Task Management: Scope estimation, defining components and interfaces, and managing user stories and tasks with JIRA.

Sprint Planning: planning sprint priorities and maintaining the product backlog.

Usability Testing: Participating in usability testing sessions to ensure intuitive interfaces.

Product Documentation: Contributing to documentation to align the team and ensure clarity in deliverables.

iCertus

4 anos 3 meses

Tech Lead

outubro de 2022 - janeiro de 2025 (2 anos 4 meses)

Curitiba, Paraná, Brazil

Software Development: Continuous work on Frontend, Backend, using tools like Vue.js, Node.js, Adonis, Ruby on Rails.

Infrastructure & DevOps: Manage the cloud infrastructure (GCP, AWS, Heroku), including Bitbucket CI/CD pipelines to ensure scalability, performance, and security.

Cloud Architecture: Implementation of scalable solutions using Google Cloud Platform (GCP) solutions.

Workflow Management: Application of Scrum and Kanban methodologies with Jira to track metrics, identify bottlenecks, and remove blockers.

Collaboration: Active participation with product, design, and business teams to align goals and deliver optimal customer solutions.

Requirements Definition: Partnering with the Product Owner to ensure technical feasibility and accurate effort estimation.

Technical Support: Supporting internal teams by troubleshooting and resolving technical issues.

Consulting and Mentoring: Acting as a technical advisor through pair programming, code reviews, and mentoring, ensuring adherence to standards like Semantic Commits and GitFlow.

Standards and Roadmaps: Defining development practices and executing roadmaps for product and microservices evolution.

Bug Management: Handling production bugs using tools like Cypress for end-to-end testing, ensuring stability.

Innovation: Researching and integrating new technologies like GraphQL to improve performance and scalability.

Documentation: Recording technical decisions and trade-offs using tools like Confluence or GitHub.

Team Leadership: Recruiting, onboarding, and mentoring developers, fostering growth and collaboration.

Team Empowerment: Encouraging productivity, quality, and alignment through agile practices and individual support.

### Senior Full Stack Developer | Lead Frontend

julho de 2021 - outubro de 2022 (1 ano 4 meses)

Curitiba, Paraná, Brasil

Frontend and Backend Development: Active development using frameworks like Vue.js, Node.js, and Adonis.js, ensuring high-quality deliveries across platforms.

Integration Development: Design and execution of integrations between internal products and external partners using tools like REST APIs, GraphQL, OAuth2 and RabbitMQ.

Software Architecture: Definition of scalable architectures leveraging Google Cloud Platform (GCP), Node.js, Adonis, Ruby on Rails, and best practices like MVC and microservices.

Agile Methodologies: Application of Scrum and Kanban with tools such as Jira and for sprint planning, organizing user stories, and managing workflows.

Requirement Gathering: Collaborating on product requirements and coordinating releases using Confluence for documentation and GitHub for version control.

Team Management: Daily squad management through tools like Slack for communication and Jira for tracking progress, ensuring clear goals and alignment.

Feedback and Empowerment: Conducting regular 1:1 meetings to offer feedback and using code review tools like GitHub Pull Requests to foster quality and collaboration.

Task Management: Detailing and assigning tasks with tools like Jira and monitoring deadlines to ensure timely delivery.

Performance Monitoring: Tracking team performance with metrics available in Jira or custom dashboards integrated with analytics tools.

Conflict Resolution: Addressing blockers using collaborative tools like Slack, discord and fostering team alignment through retrospectives.

## Senior Frontend Developer

novembro de 2020 - julho de 2021 (9 meses)

Curitiba, Paraná, Brasil

### Activities and Responsibilities:

Frontend Development: Development using Vue.js, Vuetify, HTML, CSS, and JavaScript, creating scalable and dynamic components.

API Integration: Consumption and integration of Backend APIs built with Ruby on Rails, Node.js, Adonis.js, and Java.

Client Architecture: Design and implementation of the ERP Frontend architecture, including Pages, Layouts, Services, and Plugins.

Authentication Systems: Support in implementing a single sign-on module using OAuth2.

Modern Architectural Patterns: Application of patterns like Composition, Containers, REST, and GraphQL.

UI/UX Design: Design of interfaces and components with Design Systems and Design Patterns, ensuring usability and scalability.

Code Reviews and Version Control: Conducting code reviews and managing repositories with GitHub and Bitbucket.

Testing and Deployments: Creation of unit tests with Jest and deployment using AWS, Heroku, and CI/CD pipelines with Bitbucket.

Package Management: Dependency management with Yarn and Webpack.

Database Support: Assisting with backend database modeling for PostgreSQL.

Asynchronous Processes: Support in building asynchronous workflows using RabbitMQ and Webhooks.

### Collaboration and Management:

Requirement Analysis: Analysis of business and product requirements, ideation, and prototyping.

Task Management: Scope estimation, defining components and interfaces, and managing user stories and tasks with JIRA and Basecamp.

Sprint Planning: Collaboration in planning sprint priorities and maintaining the product backlog.

Usability Testing: Participating in usability testing sessions to ensure intuitive interfaces.

Product Documentation: Contributing to documentation to align the team and ensure clarity in deliverables.

## InCuca

Desenvolvedor Full Stack Senior

agosto de 2020 - outubro de 2020 (3 meses)

Florianópolis, Santa Catarina, Brasil

Desenvolvimento frontend (Vue.js, Vuetify, Quasar, HTML, CSS, JS, Bootstrap, jQuery)

Desenvolvimento backend API's Rest (Node.js, Strapi, Adonis.js)

Modelagem de banco de dados e queries(MySQL, SQLite, MongoDB, Knex.js)

Configuração de gerenciadores de pacotes e bundlers (npm, yarn, parcel, webpack)

Integração de Gateways e API's de terceiros (IUGU, RdStation, SendGrid)

Versionamento de códigos e integração de repositórios (GIT, GITLAB)

## SoluTI - Soluções em Tecnologia

Desenvolvedor Full Stack Pleno

agosto de 2016 - março de 2020 (3 anos 8 meses)

Vitória da Conquista, Bahia, Brasil

Desenvolvimento back-end utilizando PHP com Zend Framework

Desenvolvimento front-end: utilizando HTML, XML, CSS, jQuery, jQueryUI, Ajax, Bootstrap, JSON, React.js

Desenvolvimento CMS: utilizando WordPress ou CMS próprio feito com Zend Framework

Desenvolvimento Mobile Híbrido: utilizando Cordova, IntelXDK ou ReactNative

Desenvolvimento de sistemas ERP modular próprio no padrão MVC com stack Zend

Reestruturação completa do layout do ERP fazendo a transição para responsivo;

Implementação de Design UI/UX de todos os módulos do ERP;

Desenvolvimento de módulos, lógicas e funcionalidades para o sistema com regras de negócios das áreas de direito, medicina, logística, financeira, estoque, auditoria hospitalar, etc.

Gestão de banco de dados relacionais MySQL

Controle de versão e Gestão de repositórios GIT e BitBucket

Deploy de aplicações em nuvem própria utilizando GIT

Deploy de sistemas legados com FTP

## Goldman Marketing Group

Front End Wordpress Developer

dezembro de 2015 - junho de 2016 (7 meses)

Burbank, Califórnia, Estados Unidos

Desenvolvimento Wordpress: Versões responsivas, Edições de Layouts e Temas, Criação e Configuração de plugins e funcionalidades, Call to action, PSD to HTML, MailChimp, Deploy de temas e sites

Desenvolvimento web back-end utilizando PHP com CMS Wordpress , Magento , Woocommerce

Desenvolvimento web front-end utilizando HTML5, CSS3, jQuery, SASS  
Otimização de métricas de performance em sites (GTMetrix, Page Speed Insights, YSlow)

Utilização de outras ferramentas de apoio como GIT, Filezilla (FTP), Dropbox, Google Docs, Skype

## SoluTI - Soluções emTecnologia

Desenvolvedor Full Stack Junior

maio de 2012 - dezembro de 2015 (3 anos 8 meses)

Vitória da Conquista, Bahia, Brasil

Programação Web orientada a objetos, com a IDE NetBeans

Desenvolvimento back-end utilizando PHP com Zend Framework, SQL, aplicações no padrão MVC

Desenvolvimento front-end: utilizando HTML, XML, CSS, jQuery, jQueryUI, Ajax

Desenvolvimento CMS: utilizando WordPress.

Versionamento de projetos GIT

Utilização de outras ferramentas de apoio como MySQL Workbench, phpMyAdmin, Filezilla(FTP), Twitter Bootstrap, Font Awesome

## Camisetas Mochilêro - Vestindo Idéias

Sócio-Proprietário / Desenvolvedor Web

janeiro de 2009 - dezembro de 2011 (3 anos)

Brumado, Bahia, Brasil

Criação e manutenção do site institucional da marca e do canal de e-commerce (Wordpress com Woocommerce);

Gerenciamento das Mídias Sociais da marca (Comunidade e Perfil Orkut, Página do Facebook);

Gerenciamento da confecção e estamparia de camisetas em algodão;

Criação de estampas e vetorização de imagens;

Vendas no Varejo e pelo E-commerce;

Desenvolvimento de ações de marketing para as redes sociais;

## Infor-Eletrô Computadores

Técnico em Informática

agosto de 2008 - setembro de 2009 (1 ano 2 meses)

#### Brumado-BA

Manutenção e montagem de computadores, periféricos e redes;  
Instalação e configuração de diversos tipos de software (antivirus, pacote office, sistemas operacionais, CFTV, VOIP, FTP Server, etc);  
Diagnóstico e resolução de problemas (otimização, resolução de travamentos, remoção de virus);  
Atendimento remoto via fone, Msn e Skype (Helpdesk, Hamachi, Team Viewer);  
Implementação de redes com e sem fio (LAN, WAN, FTP server);  
Instalação e configuração de hardware (impressoras, scanners, modem adsl, roteadores e diversos outros periféricos)  
Implementação de Servidores de Impressão, Recarga de Cartuchos de Tinta  
Instalação e configuração de sistemas de vigilancia Camera sobre IP e CFTV  
Recuperação de dados em disco rígido via software;

#### Mega Elétrica Ltda

Técnico em Informática/de Campo

janeiro de 2008 - março de 2008 (3 meses)

#### Brumado-BA

Manutenção de computadores, periféricos e redes;  
Desenvolvimento de rede interna (LAN) e de circuito de tv (CFTV)  
Coleta de pontos geográficos utilizando GPS, p/ futura implantação de postes e rede elétrica;  
Desenvolvimento de planilhas colaborativas online (conferência de materiais, horário de empregados..);  
Correção de projetos da rede elétrica na planta (CAD);

#### Objetiva T.I

Técnico em Informática/Redes

março de 2006 - dezembro de 2007 (1 ano 10 meses)

#### Vitória da Conquista-BA

Desenvolvimento de projetos ligados a redes (ponto-a-ponto, enlace entre cidades/bairros);  
Implementação de redes (LAN, WAN, Pontos de Acesso);  
Instalação de equipamentos de rádio (router 802.11, torres, antenas, cabeamento);  
Implementação de servidor e cliente VOIP (Asterisk e Trixbox);  
Manutenção de computadores e redes;

#### Pax Nacional

## Técnico em Informática/Auxiliar Administrativo

janeiro de 2006 - março de 2006 (3 meses)

Brumado , Bahia, Brasil

Criação de banco de dados com MS Access;

Criação de interface html simples para consulta nos bancos de dados;

Impressão de boletos e carnês;

Controle de pagamento dos boletos via software;

Atualização da base de dados da empresa, migrando arquivos de papel para banco de dados MS Access;

Cadastramento de usuarios do plano de saúde e do plano funerária ;

Controle de backup on-line;

Serviços de manutenção nos equipamentos de informática e rede;

---

## Formação acadêmica

### Full Cycle

Postgraduate Degree, Pós-Graduação em Liderança Técnica · (abril de 2024 - agosto de 2025)

### Universidade Estadual do Sudoeste da Bahia

Bacharelado, Ciência da Computação · (dezembro de 2016)

### CMLEM - Colégio Modelo Luis Eduardo Magalhães

2º Grau do Ensino Médio, Formação Geral · (2003 - 2006)
